Job Application for IT/Linux Systems Administrator

Dear Mrs. Guerrero,

I hope this letter finds you well. My name is Dylan, and I'm a programmer at National Fuel. Recently, I began searching for a new challenge, something more interesting than my current position and that is when I came across your posting for an IT/Linux Systems Administrator - Ref# D1343. With my background in computer science and my experience, especially with OS X, I would make a great addition to the team.

I bought my first mac my freshman year of high school. After putting away money for years in anticipation of a big purchase and watching my Mom's old Dell die in my lap I knew what I was going to buy. From that point on I have completely engrossed myself in the Apple ecosystem learning all about OS X, the included apps and filesystem, its UNIX base and familiarizing myself with bash. Years of experience with macs and always trying to get the most out of my personal computer have given me knowledge rivaling that of an Apple Store Genius.

In addition, I have experience with networking and programming through my formal education and early career opportunities. Classes including networking and network security helped prepare me for my first job while in college setting up workstations, wiring network closets, running cables through the datacenter and installing hundreds of 1Gb NICs. I also began working with Python creating small CLI programs and setting up flask servers.

The exploding job market and reputation around being a developer led me to my current position as a programmer. My time at National Fuel has taught me a lot about all aspects of the software development life cycle, but has not intrigued me the way positions on the operations side of technology have.

I look forward to discussing the position further and learning more about the opportunities available at Indeed. If I can provide anything else you might need please let me know. I look forward to hearing from you. I can be reached at dylan.rumbold@gmail.com and 716-245-3101.

Thank you for your consideration.

Sincerely,

Dylan Rumbold
